

Tsunami Hazard Map 3

Key

- Area flooded between 3.0 and 5.0m
- Area flooded between 0.5 and 3.0m
- Area flooded below 0.5m
- Local authority regional border
- Evacuation target area
- ♿ Emergency evacuation location
- ▲ Evacuation target point
- ♿ Temporary tsunami evacuation location

*You should evacuate in principle regardless of flood depth. (If there is no time to evacuate and it is dangerous to go outside, you should evacuate vertically)
*Please check the latest situation regarding open evacuation locations.

Rough time required for evacuation (23m/min)

5Minutes	10Minutes	15Minutes	20Minutes	25Minutes	30Minutes	35Minutes	40Minutes
----------	-----------	-----------	-----------	-----------	-----------	-----------	-----------

*23m/minute: Specified based on assumption that an earthquake has occurred, and liquefaction has taken place.
*This will depend on the circumstances and your individual situation, so should be considered no more than an indication.
